## EARLY CHILDHOOD EDUCATION

#### EARLY CHILDHOOD SPECIAL EDUCATION

Early Childhood Special Education (ECSE) is now part of the Exceptional Student Services (ESS) Unit. For early childhood SPED related questions, please use their new ECSE contact info: Main Line: 602-542-4013 <a href="mailto:ECSEInbox@azed.gov">ECSEInbox@azed.gov</a>

## Early Literacy Grant Awarded to AZ

Arizona was recently awarded a five year \$20 million
Comprehensive Literacy State
Development Grant (CLSD) to improve language and literacy skills for students most in need.
The grant project was developed through the collaboration of ADE, Read On Arizona, and First Things First.

"Children begin developing language and pre-literacy skills long before they enter kindergarten. This grant will help us support educators in childcare and preschool settings with the research-based tools they need to ensure young children start school ready to learn to read."

- Marilee Dal Pra, FTF CEO

**Education Agencies** (LEAs) deployed scenariobased models for the delivery of instruction for the 2020-2021 school year utilizing benchmarks established by the Arizona **Department of Health** Services. These instructional models have had significant impacts on the early care and education field, who are providing safe environments for children birth through age 12. This document serves to provide guidance and key considerations for providers and LEAs alike.

### INTRODUCING THE 2ND EDITION OF ARIZONA'S ITDG

Arizona recently adopted newly revised Infant Toddler Developmental Guidelines. The new guidelines have been the result of two years of collaborative work, led by ECE Program Specialist, Sas Jakeo-Singer, amongst early childhood experts and thought partners to ensure Arizona has up-to-date developmental guidelines for our state's youngest learners. Several early childhood partner agencies, districts, and ECE partners worked together to make recommendations and revisions to the guidelines.

A PDF version of the publication is available here: Arizona's Infant Toddler Developmental Guidelines, 2nd Edition. The manual link as well as information on how to order multiple print copies can be found on the ECE Publications & Manuals webpage. In addition, a new online course module that coincides and supports the

updated Guidelines can be found on pg. 3 of this newsletter with Professional Development opportunities. The course can be found in the "October 2020 Online Courses" section entitled: **Intro to Infant and Toddler Developmental Guidelines**.

## **ECQUIP Update**

ADE ECE strongly encourages the continued use of the ECQUIP process to improve outcomes for our state's youngest learners by connecting them, their families, and practitioners with supports needed, Arizona created the <a href="Early Childhood Quality Improvement Process">ECQUIP</a>).

Early Childhood systems building is the ongoing process of improving infrastructure, connections, and components within our state. The ECQUIP process is intended to bring early care and education providers and stakeholders together to break down silos, improve communication, and align goals across and within the early care and education system.

Due to the fragmented nature of various systems that support young children, ECQUIP was created to be a vehicle for building, enhancing, and sustaining coherence so that infrastructure, programming, and the different early care and education sectors could operate as a whole to improve outcomes for children and their families. The local ECE systems created out of ECQUIP allow for the strong foundations needed to address a child's educational success.

If you have questions about ITDG, ECQUIP, or other general ECE inquiries, please email the Early Childhood Education team:

ECEInbox@azed.gov

If you have questions about preschool special education, please email the Early Childhood Special Education team: <a href="mailto:ECSEInbox@azed.gov"><u>ECSEInbox@azed.gov</u></a>
